

COMPANY

Brikk — Company rundown

What it is, who it's for, how it works, and where it's going.

What Brikk is

Brikk is the single screen a real estate agent opens every morning that tells them exactly what to do. It combines a CRM, AI follow-up writer, deal tracker, smart calendar, marketing analytics, and SMS — all designed for solo agents and small teams who are tired of juggling eight apps and losing leads to forgotten follow-ups.

The product replaces tools like Lofty (\$300–500/mo), Follow Up Boss, and Chime — at \$75/mo. It's not a CRM with AI bolted on. The AI is the product: it reads each lead's context, drafts the message, and tells the agent why to send it now.

The problem

Real estate is a follow-up business — and most agents are bad at it. The data is brutal:

- **78% of buyers** pick the first agent who responds.
- Average agent response time on a new lead is **15 hours**.
- **80% of sales** happen after the 5th follow-up — but most agents stop at three.
- Existing tools cost \$300–500/month, take 6+ hours to set up, and require a dedicated trainer.

The result: hot leads go cold, deals slip, agents burn out chasing leads they already paid for. Every agent we've talked to has the same complaint — "I know I should follow up, I just don't have the time or the right words."

How Brikk solves it

Today Dashboard

One screen. Auto-prioritized action list. Tells you who to call, in what order, before the day starts.

AI Copilot

Reads each lead's full context (temperature, days since contact, message history, notes) and drafts a personalized SMS or email. Agent reviews, approves, edits, or skips. Explains why each message should be sent now.

Lead Pipeline

18 realtor-specific fields including pre-approval, timeline, bedrooms, preferred area, contact preference. Filter, sort, search.

Deal Tracker

Visual stage progression Contract → Closing. Auto-flags deals approaching deadlines. Commission tracking.

Smart Calendar

Auto-populates from leads and deals — follow-up reminders, milestones, closing deadlines. Every event has AI context.

Marketing ROI

Shows which lead sources actually close deals — not just generate leads. Pie chart + source-by-source conversion table + AI insight.

Messages

Send real SMS to leads via Twilio. Full conversation history per lead. AI draft button. Reply webhook routes replies back to the right lead.

Voice-to-CRM

Tap the floating mic, talk naturally about a lead, AI extracts structured fields and saves to the right record.

Lead Capture Link

Each agent gets a friendly URL — brikk.store/r/CODE — to put on business cards, in Instagram bio, on yard signs. Submissions land in the agent's pipeline; agent gets a live alert.

Team & Agency Plans

Team owner subscribes once; agents join with a shared team code. No per-agent billing. Scales from solo to brokerages.

Who it's for

- **Solo agents** who close 8–30 deals/year and are tired of paying for tools they barely use.
- **Small teams of 2–5** who want one shared pipeline without IT overhead.
- **Brokerages and agencies** looking to standardize follow-up across their roster on one Agency plan.
- Geographic focus initially: Southern California, Utah, Arizona, Nevada. Expanding nationally.

Pricing

Plan	Who it's for	Price
Pro	Solo agent	\$75 / month
Team	Up to 5 agents	\$200 / month
Agency	Unlimited agents	Custom (contact sales)

Every plan includes a 45-day free trial. No credit card to start. One-time \$125 setup fee on Pro and Team.

Tech stack & infrastructure

- **Frontend:** Next.js 14 (App Router), React 18, deployed on Vercel.
- **Database & auth:** Supabase (Postgres + row-level security + realtime).
- **AI:** Anthropic Claude (Sonnet 4.5) for drafts, voice extraction, and the landing-page chat.
- **SMS:** Twilio (sending + webhook-verified inbound replies).
- **Billing:** Stripe (subscriptions + setup fees + 45-day trials).
- **Mobile:** Progressive Web App today. Capacitor iOS build for the App Store next.

Business model & unit economics (current)

Pro plan is \$75/month with a \$125 one-time setup fee. Variable costs per agent run roughly \$4–6/mo (Supabase reads, Anthropic API, Twilio SMS at modest usage, Stripe fees). Gross margin is ~90% on Pro. Team plan (\$200/mo for 5 agents) is more profitable per seat because shared infrastructure.

Annual contract value: \$1,025 (Pro) on a single seat including setup. If an agent closes one extra deal/year because of better follow-up, average commission is \$7,500. ROI for the agent: 7×. That's the pitch.

Roadmap (next 90 days)

- **Stripe webhook tied to teams** — gate team creation on a verified active Team or Agency subscription.
- **iOS App Store submission** via Capacitor build of the existing PWA.
- **CSV import** for migrating leads from competing CRMs.
- **Push notifications** for new referral-link leads and Copilot draft batches.

-
- **MLS integration** (Bridge or Spark API) — pull listings into Copilot drafts ("3 new listings under \$400K this week").
 - **Email channel** alongside SMS — Sendgrid or Resend integration, full drip support.
 - **Webhook to Zapier/Make** for agencies that want to connect Brikk to their existing stack.
